

How much can you earn with Tapestri?

Install the Free App With The QR Code Below

Usually, you can earn any amount from **\$5 to \$25 per month**. However, the amount may vary as per your geographic location and the period you installed the app. Even though the app doesn't cost you anything, the only thing you should worry about is your data being extracted daily

Having over a decade of data-monetizing experience, Walter Harrison – the Chief Revenue Officer at Complementics – has recently come up with the Tapestri app to offer you money in exchange for your data.

The app runs in the background of your phone and collects *anonymous location data* on a daily basis.

Unlike other social media apps, including Facebook and Instagram, Tapestri doesn't do anything secretly. Instead, it asks for your permission before tracking your data.

But with the rising security concerns in today's world, is Tapestri really doing what it claims, or is there anything you should worry about? In this Tapestri review, we are going to discover all these aspects and see whether you should opt in to Tapestri or not.

What is Tapestri?

Tapestri is a service that runs alongside the other apps in your phone's background. According to Tapestri's official website, their primary purpose is to collect anonymous location data of smartphone users who agree to their terms and install the app.

Of course, no one is knowingly going to provide their data for free, right? That's why Tapestri offers you an appealing amount of money in exchange for your most valuable asset – your data.

Although there are multiple programs that offer you different amounts, the standard earning is up to \$25 each month.

Nowadays, almost every app is tracking your data, which they may or may not mention in the Terms & Conditions that everyone agrees to without reading thoroughly. The most impressive thing about Tapestri is that they don't bury themselves deep behind the "Terms & Conditions."

Besides, most apps even sell your data for billions of dollars, without giving you a single penny.

That's where Tapestri comes into the spotlight. The service clearly mentions that it is going to collect your data and sell it to other parties, but will pay you a good amount for that.

Their tagline is ***"It's Your Data, You Should Get Paid For It"***

Besides, Walter's previously founded company, Complementics, has also offered the mobile location analytics service for Fortune 100 companies. However, in 2015, he sold the company to info.com, and became its Co-Founder and Chief Revenue Officer. So, after all, Tapestri isn't the product of a rookie player.

How To Start With Tapestri?

Like every other app, you need to download the app and register yourself with a sign-up account. Luckily, the process is simple and basic, that is completed in just 3 steps:

1. First, download the app from Google Play or Apple App Store.
2. Next, fill in your details and sign-up.
3. Lastly, agree to the terms, and you are done.

How to Earn From Tapestri?

Tapestri gives the users multiple options to make money. Not only do their affiliate programs pay off really well, but the free app version also offers a good amount to start with.

Primarily, you can earn from Tapestri in two different ways, by installing the free app on your smartphone or subscribing to its Affiliate Program. The

good thing is that you can earn from both methods simultaneously or just see how it goes with only one.

Here is how you can earn from Tapestri:

1. **Install the Free App**

Fortunately, the Tapestri app is free, so you can install it on your smartphone easily. Once you install it, don't forget to change the location settings in the app to "Always."

Usually, you can earn any amount from \$5 to \$25 per month. However, the amount may vary as per your geographic location and the period you installed the app.

Even though the app doesn't cost you anything, the only thing you should worry about is your data being extracted daily.

2. **Affiliate Program and Compensation**

Another way to earn from Tapestri is by becoming an affiliate. Strangely, though, users have to subscribe to the affiliate program and pay a fee of **\$9.95/month**. The Tapestri Affiliate Program offers users commission when they convince others to install and sign-up for their app.

There are two tiers or levels for commissions:

Tier 1

At this level, you will earn \$1 for each friend who joins the app with your affiliate link.

For example, if you convince 15 people to install and join the app through your affiliate link, you will make a total of \$15.

Since there is no restriction on the number of referrals, you can invite as many people as you want and increase your total commission.

Tier 2

In tier 2, you will earn when your referrals from tier 1 invite other people to install and use the app. The earning amount in this level is the same as tier 1. However, the maths is slightly different.

For example, suppose your 15 tier 1 referrals recommend the app to 4 people each (60 people total). So, you will earn $\$1 \times 60 = \60 .

Like tier 1, there is no limit to the referrals of tier 2, so you can ask your referrals to invite as many people as they can.

People with good marketing and sales skills can even earn \$100+ a month.

On the other hand, those who aren't good with other people can also make good money from Tapestri. They have to install the app and let it harvest their data monthly to reap a few bucks at the end of each month.
